

## 15. Resultant Pattern Form Instructions

Before you start Copy this form for each Resultant Pattern that you have. Before you start, cut out each actual case from a copy of the Actual Case Form to make Actual Case cards. You can make extra cards in the same way.

- ① Transcribe the resultant pattern of Form 14: Framework • Resultant Sentence Form. In the two blanks on this form, write a unique number for sorting the copies.
- ② Attach the Actual Case card that describes the corresponding resultant pattern. (You can staple or transcribe the pattern too.)
- ③ Write down things you notice freely.

The group of new actual cases that you collected on this form will be a new pattern cluster. You can extract aspects through various methods from one felt sense (meaningful feeling).

Try comparing the Actual Case Group (pattern cluster) from Form 6: Pattern Extraction Form and the one from Form 15: Resultant Pattern Form.
